SUMMARY

I am a passionate Flutter Developer with proven skills in creating functional and visually appealing mobile applications. My expertise spans from efficient Dart coding to performance monitoring and collaborating with design teams. I stay updated with the latest technologies, ensuring I deliver innovative solutions in dynamic environments. My commitment to quality is reflected in my proactive engagement with open-source projects and community contributions

EXPERIENCE

Flutter Developer

Mercu

📅 02/2023 - 02/2025 📍 Guindy, Chennai

A company focused on mobile application development using Flutter technology

- Developed cross-platform mobile applications for Android and iOS using Flutter, ensuring seamless performance and user experience
- Wrote efficient code in Dart, collaborating with designers for visually appealing interfaces
- Utilized Flutter's layout system for responsive designs, and integrated RESTful APIs for backend communication
- Managed asynchronous data flow, ensuring app reliability and performance optimization
- Wrote unit tests to maintain code quality, supported Firebase Authentication, and used Git for version control
- Engaged with Flutter communities, contributing to open-source projects

EDUCATION

BCA

Thiruthangal Nadar College

📅 08/2020 - 05/2023 📍 Chennai

SKILLS

Flutter	Dart	Android iOS	Riverpod	Getx
REST	Dataflow	Google Firebase	Git	JavaScript

PROJECTS

Mercufy, Employee Login and Leave Management App

📅 01/2023 - 12/2023

An internal application designed to streamline employee login and leave management processes

- Implements authentication for employees to access personalized dashboards
- Allows employees to apply for leave with real-time status updates
- Facilitates tracking of office tasks and leave records for better organization
- Sends reminders and updates for leave approvals or task deadlines

Merdrxez, Doctor Appointment and Consultancy App

📅 01/2023 - 12/2023

An internal application designed to simplify access to healthcare services

- Enables users to search for doctors and schedule appointments effortlessly
- Offers a platform for users to consult with healthcare professionals at no cost
- Provides a clean and intuitive design for easy navigation and usability

Storage Master, Vehicle Booking for Household Moving

📅 01/2023 - 12/2023

An internal application that simplifies the process of booking vehicles for moving household items

- Offers a wide range of vehicles categorized by storage capacity to meet user needs
- Allows users to book vehicles in advance with real-time availability updates
- Provides users with a cost estimate based on the selected vehicle and storage size
- Features an intuitive design for easy navigation and booking

Fund Me Smart, Funding and Rewards Application

📅 01/2023 - 12/2023

A funding application that enables users to subscribe, donate to organizations, and earn rewards in the form of coupons

- Allows users to subscribe to the platform and access exclusive features
- Facilitates donations to various organizations with transparent tracking
- Provides free coupons proportional to the user's donation amount, which can be claimed and redeemed for store discounts
- Integrates with partner stores for coupon redemption and exclusive offers
